

Who Else wants to save \$500 or more on their Monthly Phone Bill?

Our New Phone System could Save You Thousands this year – And give you all the big-time benefits of a full-featured system!

"We recently had TC-PC install a VoIP system for our offices. They not only gave us a great product that was far better than conventional phones, but also saved us hundreds of dollars on our phone bill."

**Chad Gatlin, Chief Administrator
Town of Brighton**

see Chad's full testimonial at the end of this letter

Dear Friend,

Do you want a phone system with all the features of the big companies – **Voice Mail, Automatic Call Forwarding** (to remote sites, even your cell phone), **Automated Attendant**, and much much more – **ALL STANDARD and INCLUDED??**

Do you want a **powerful phone system** that will grow as your business grows?

Do you want to **consolidate all your locations** into one call center, with one receptionist?

What if you could get **all these great features**, and still **SAVE THOUSANDS of Dollars** per year on your phone bills vs. your current phone system?

If this sounds good to you, I can help.

Let me explain...

As a client of ours, you already know that we keep our promises and go the extra mile for our customers. What you might NOT know is that we also offer a new breakthrough in phone system technology that will make expensive, complicated phone systems a thing of the past.

This new system, *TC-PC's Asterisk Voice-Over-IP*, is giving the traditional phone systems a real run for their money.

Here's why...

The 4 Main Reasons Why Small Businesses Are Trading In Their Current Phone System For Asterisk Voice-Over-IP

1. **Drastically reduces your phone bill.** If you have multiple offices, or even remote workers, TC-PC's Asterisk voice over IP technology integrates your data and voice networks to drastically reduce long distance and lease line charges you are currently paying.
2. **Minimizes expensive technician visits.** TC-PC's system was built so we could easily maintain it from our office with a few simple mouse clicks. Avoid waiting around for high-priced technicians to show up or paying high service call fees. Most problems can be addressed immediately from TC-PC's office!
3. **FREE voice mail, auto attendant, call forwarding, etc.** If you've ever bought any other vendor's system, you know they charge a lot more for the extras already included standard in this system.
4. TC-PC's Asterisk System **is 25%-50% LESS expensive than other well-known phone systems** such as Avaya, Nortel, and Cisco to name a few. Yet it is so robust, the city of Manchester chose this system for their entire phone system. Our Product has recently been featured on the cover of *InfoWorld* Magazine. Their case study of this system is titled '**Asterisk Proves Its Worth.**' 'Nuff said, right? I'll be glad to send you a copy of this case study - simply give me your contact info and I'll send it out!

Free Phone Audit Shows You How To Save Hundreds of Dollars!

I'm so confident that I can help you save money with our new phone system that we're willing to make you the following **FREE** offer:

If you currently have an old PBX legacy system, sign up to receive a **Free Phone Audit** and I'll personally come out to your office and do a complete communications analysis for your company.

At the end of our audit, we'll summarize our findings and show you:

- Exactly how much money you could save by trashing your current system and upgrading to our next generation voice over IP solution.
- How you can avoid common phone problems like voice mail limitations, dropped or missed calls, and voice mail jail.
- Overlooked ways to improve customer service without overloading your front desk.

Our "No Strings Attached" Promise

I also want to be very clear that there are no expectations on our part for you to do or buy anything when you sign up for a Free Phone Audit.

So go ahead and put us to the challenge right now while you're thinking about it.

Simply call our office - Leah will be glad to setup a time for me to pay you a visit: 901-475-0275 or 1-888-794-TCPC.

TC-PC, LLC

PS. That's me on the right with Chad Gatlin, Chief Administrator at the Town of Brighton in Brighton. Chad graciously offered to write the following testimonial about our system:

We recently had TC-PC install a VOIP system for our offices. The transfer from our old phone system to the VOIP was seamless and painless. TC-PC's knowledgeable staff was very helpful every step of the way while installing the system and training our personnel on its use. They not only gave us a great product that was far better than conventional phones, but also saved us hundreds of dollars on our phone bill. They even worked with our software provider to integrate our phones with our billing system. With our entire operation networked we can operate more efficiently than ever. I would definitely recommend TC-PC to anyone considering an upgrade to their phone system or an entire networking solution for their business.
